

Revisions to the National Income of Thailand 1990-2010 edition

The compilation of national income of Thailand 1990-2010 edition has been revised back to 1990. This publication presents the new series of national income of Thailand starting from 1990 to 2010. The major revisions include the following topics.

1. Revising of concepts, definitions, methodology, and classifications in compliance with the international standard.
2. Revising of coverage by adding up the new economic activities along with improving of data sources.
3. Revising of the estimation technique of real national income from fixed based year to chain volume measures (CVM). Thus, statistical tables at constant prices have been replaced by the CVM.
4. Revising of the presentation of national income of Thailand (statistical tables) according to the international standard format including notes/remarks for some tables.
5. Providing of the explanatory notes and glossary.
6. Abbreviation
 - In this publication, letter “p” appeared in 2010 in all statistical tables stands for “preliminary”, meaning that the data in 2010 are subject to revision in the next series of publication.
 - Details of the revisions have been shown in this publication.
