# TFCP Thailand Future Cities Project NEWSLETTER NO.1

## Introduction

The Project aims to develop and policy concept and an implementation mechanism of Sustainable Future City for local and regional cities in Thailand in close coordination with National Economic and Social Development Board (NESDB) and Japan International Cooperation Agency (JICA)

## Background

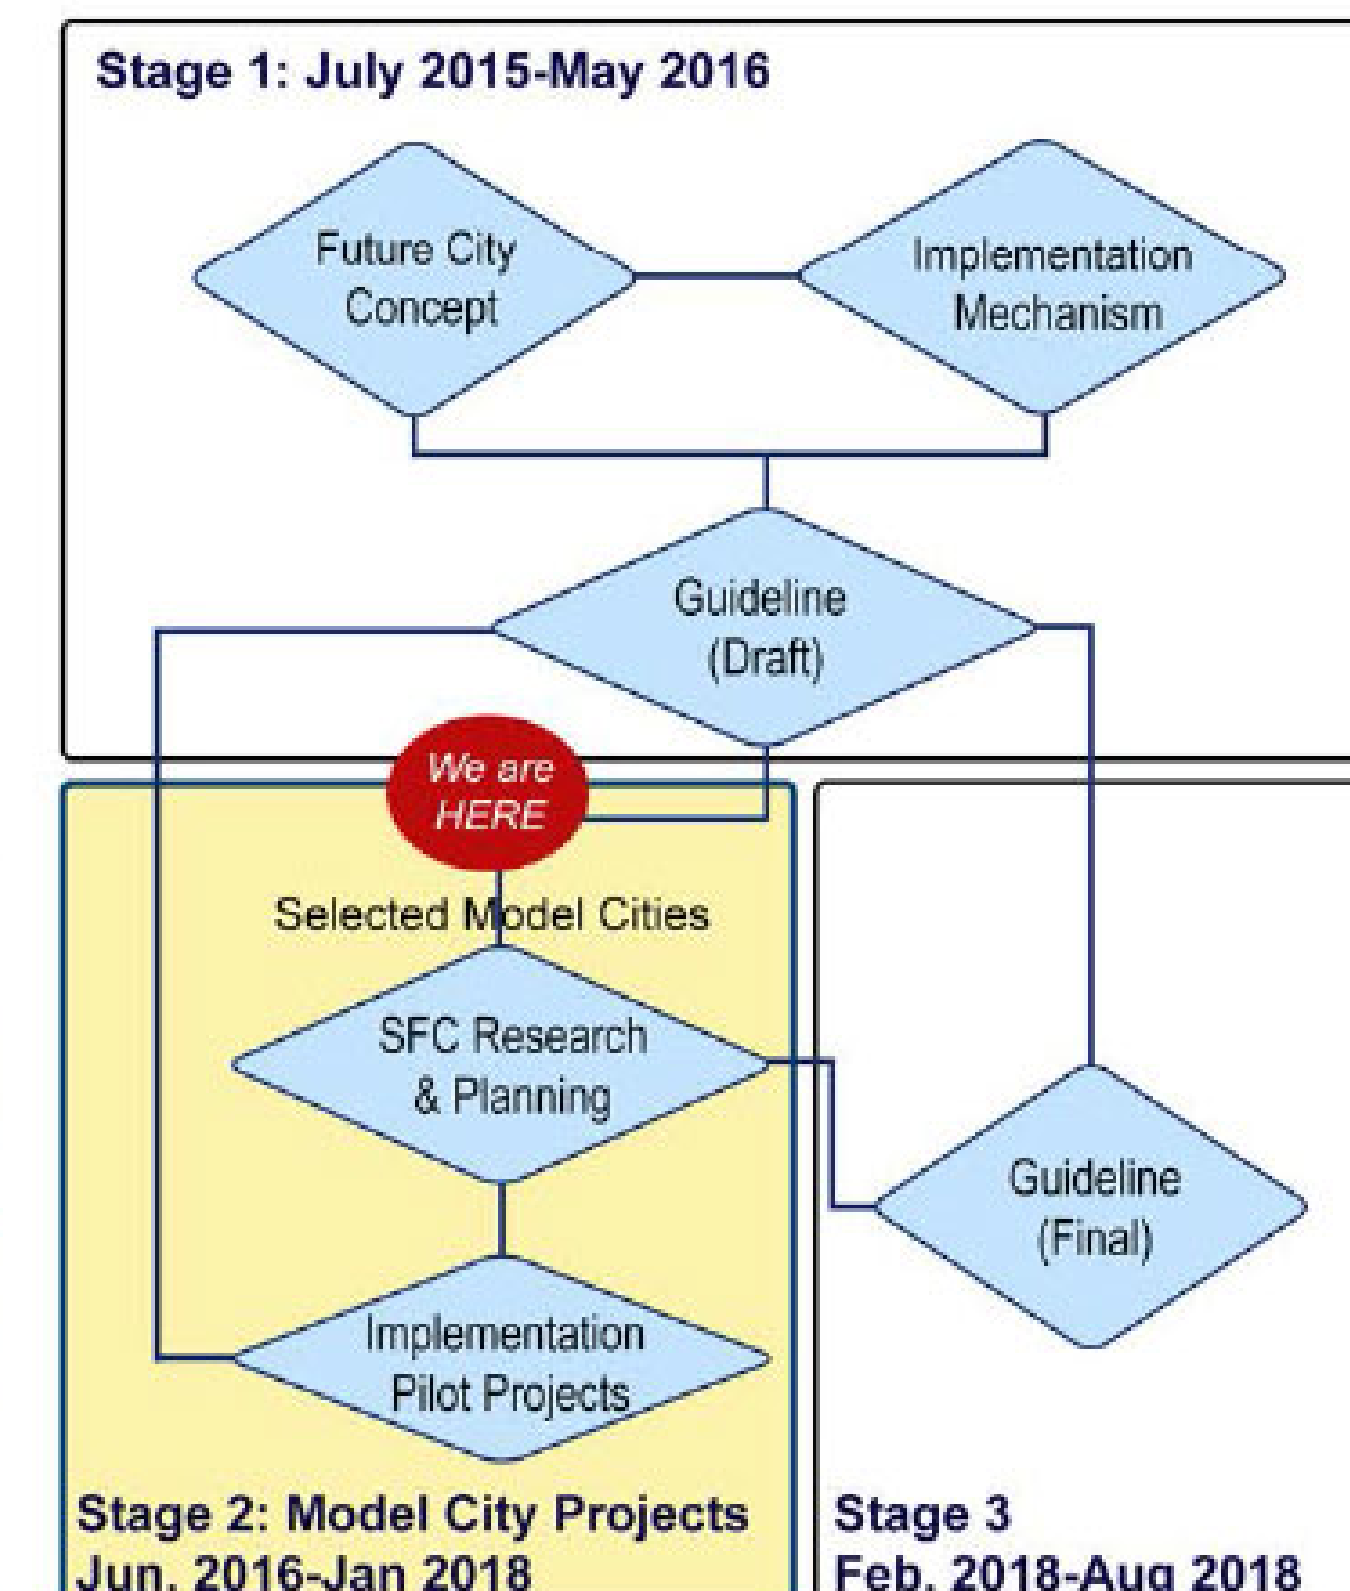

Thailand needs to have a clear-cut policy and strategies to realize sustainable and balanced growth over the nation, enhancing environmentally- friendly and livable local cities. Well-functioning social and economic infrastructures and employment opportunities should be assured to prepare for the forthcoming aging society by each city which holds a long-term vision and its concrete actions in the future.

## Objectives

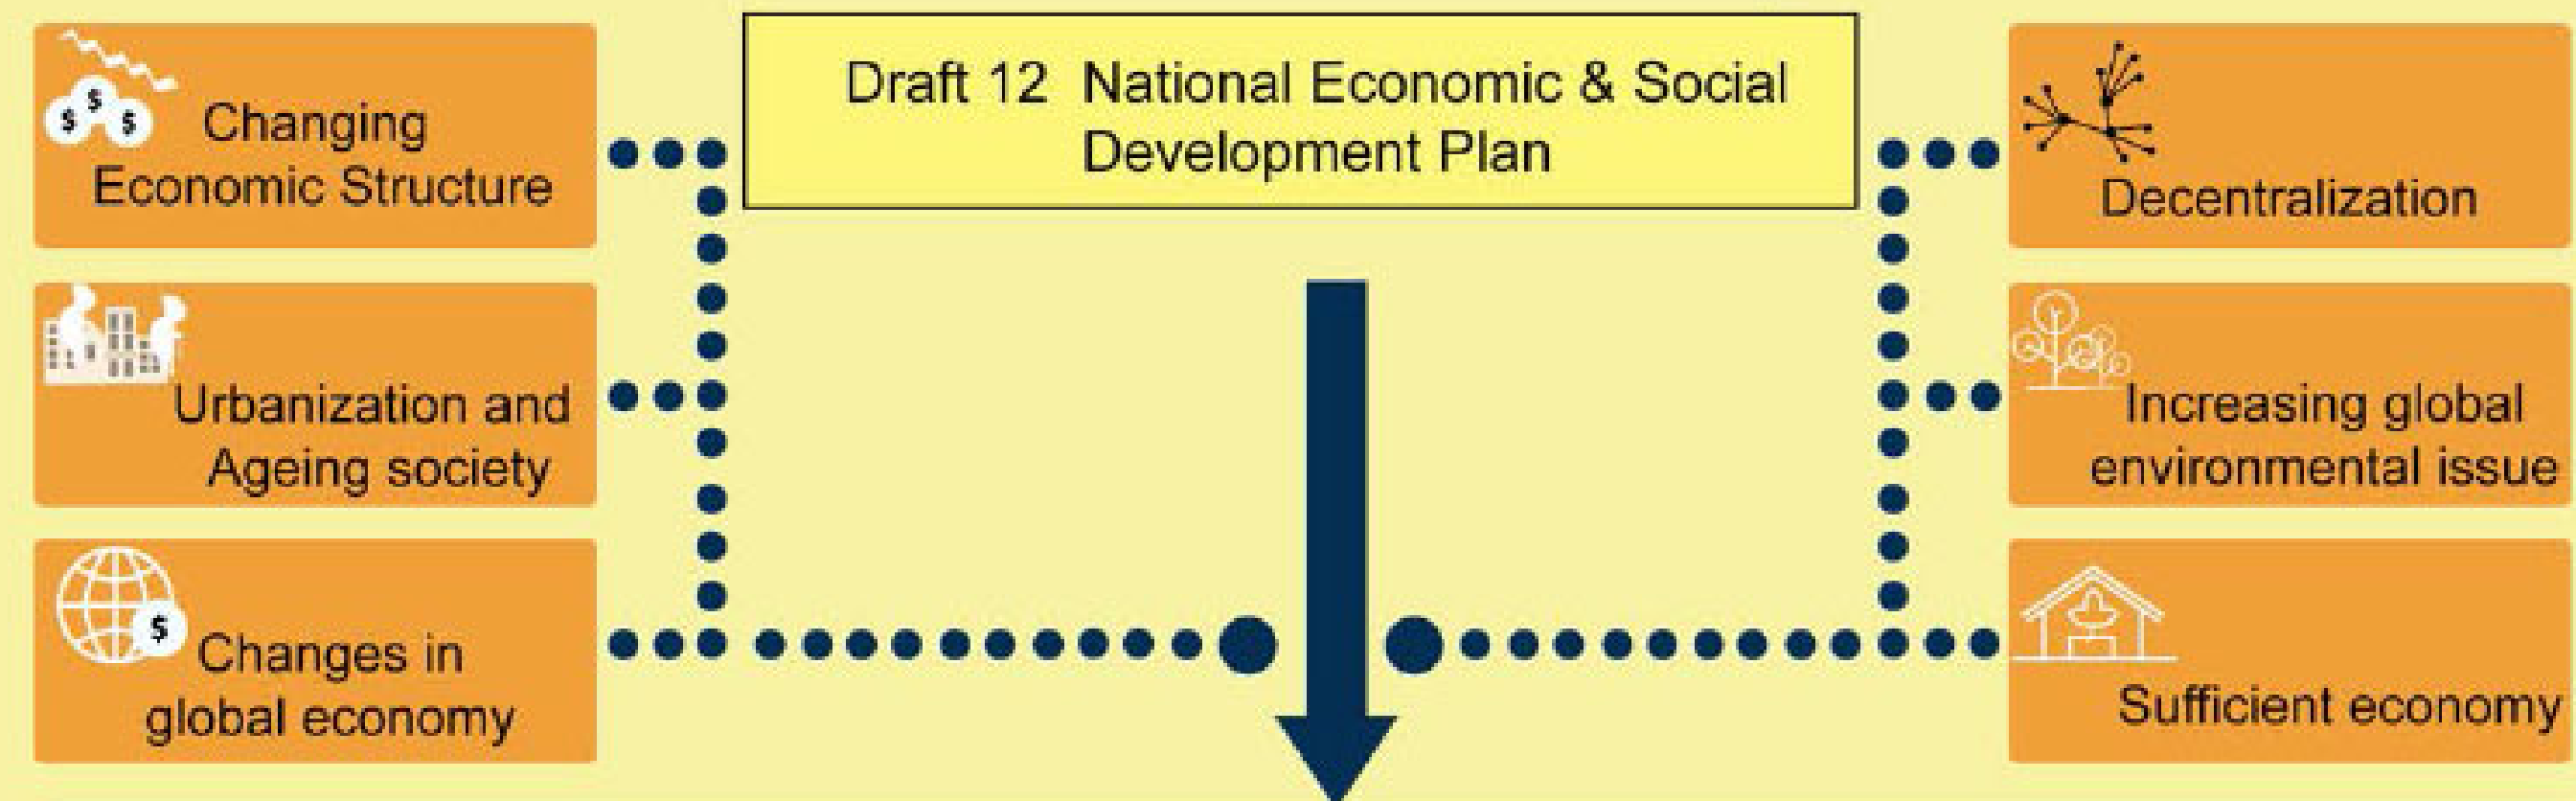

1. To establish a development concept for the Sustainable Future City (SFC) in Thailand.
2. To develop a practical implementation mechanism and measures to realize such a sustainable future city concept in Thailand.

## Schedule

## Formulation of SFC Concept

## SFC CONCEPT

# SFC Initiative

### Overall Goals:

To make cities sustainable under the emerging socio-economic changes

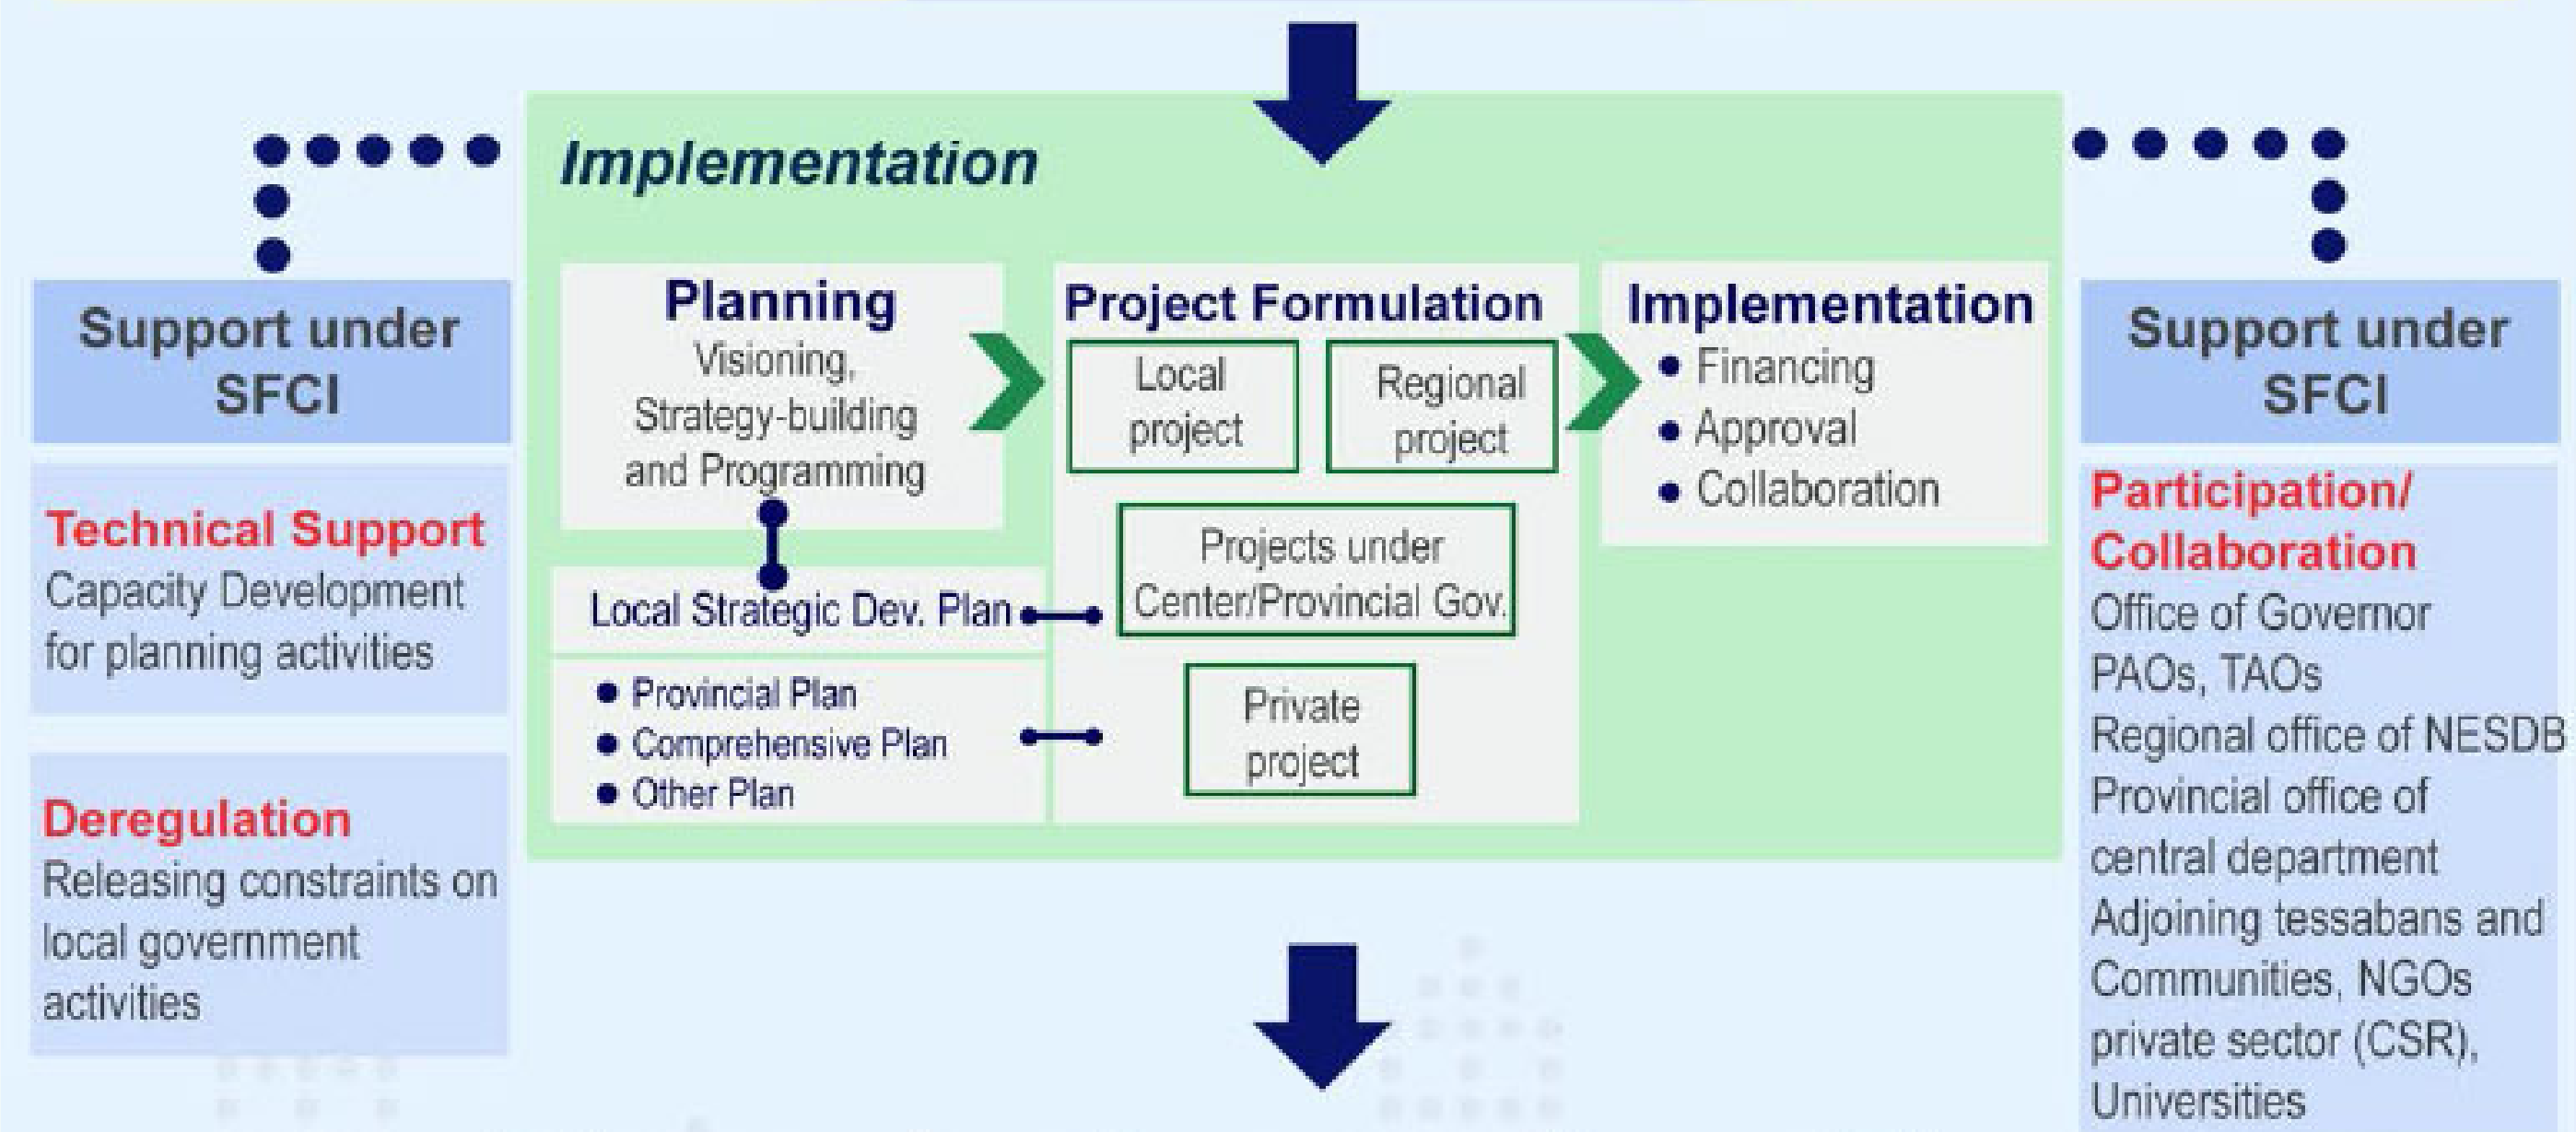

### Principle

- Local-driven development with national government guidance
- People-centered development
- National government support

### Key Approach

- 📌 **Holistic** approach
- 📌 **Regional** approach
- 📌 **Long-term future** approach
- 📌 **Collaborative** approach

## Common Vision of SFC

## Dissemination to other cities

## Hierarchy of Tessaban Nakhon and Tessaban Mueang and Selected SFCI Model Cities
